Launched Health Wellness Toilet through 100 Year journey

Concept of Wellness Toilet : CLEANLINESS—For Your Wellness

CES2021 Concept of Wellness Toilet attracted a lot of attention from customers around the world.

Some types of new sensors will be used to measure the wellness data without comfort aspects of the original toilet.

Wellness Toilet will provide Recommendations through the user interface screen on the app.

By announcing our concept for this, we look forward to meeting with new partners from around the world,

who will recognize the value in our vision for the future and want to collaborate with us

Toilets excellently support your physical wellbeing

Just use the toilet as usual

Dairy Wellness Data is automatically acquired & analyzed

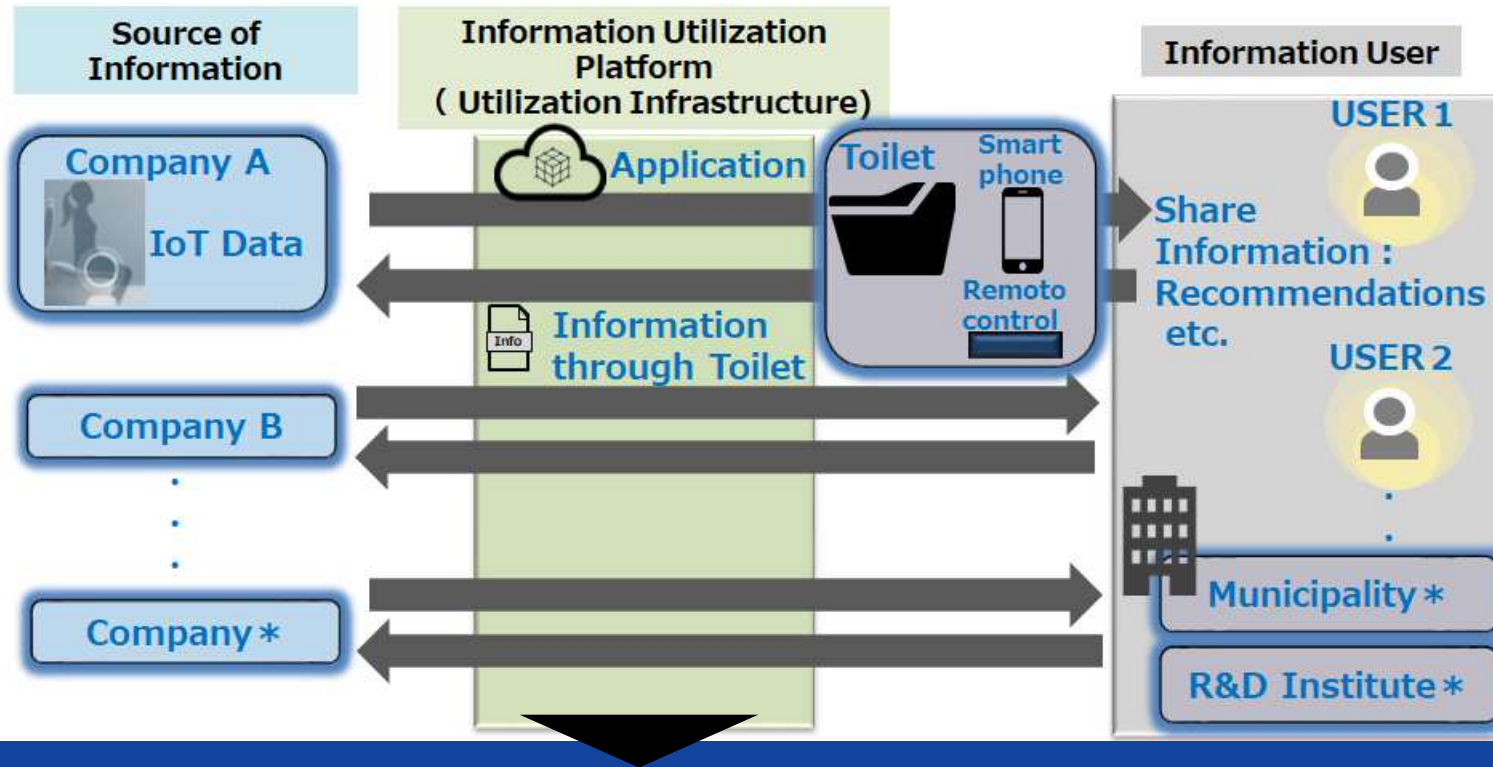

Provide Recommendations through the user interface screen on the app.

Toilets excellently add value to your life through information acquired & analyzed

Subcommittee Benefit : Information Utilization

Issue : Many Companies provide original Information for Users ,Municipality etc. that utilized it (Ex. Term definition of Recommendations)
Solution : Based on standardize Information through Toilet , We will promote to create the Information Utilization Platform that all user easy to use

Plan for standardization

Contents	FY2024	FY2025	FY2026	FY2027	FY2028
Information through Toilet/Term definition	→				
Information through Toilet/Requirement definition	→				
Information through Toilet/Measuring method		→			
Peripheral equipment/Data Linkage			→		
Information through Toilet/Standardization				→	

Collaboration with regional company that provide information Infrastructure

Collaboration with Public organization, Competent Authority, International Organization for Standardization

Based on Standardization Information through Toilet ,Toilets excellently add value to your life through information acquired & analyzed
